

Xactimate® Integration Data Request Guide

There are four pieces of information we at magicplan need from you (the user) to activate the Xactimate® integration. One can be found on the main standby menu, the other three can be found on a separate page.

Xactnet Address

This can be found while on the home page of Xactimate, click on the "Profile" icon in the top right, and copy/paste the full address of what is listed under Xactnet Address.

The next three pieces of information can be found on the Xactimate® Admin page under "Configuration".

These three pieces of information can be seen highlighted in the image below. Please provide the entirety of each of these numbers/sequences. They are necessary to connect your Xactimate account to your magicplan account.
